

Sports day

On sports we did our races as well as helping foundation, year 1 and year 2. As soon as we got into school (some people came in early to help set up.) we were registered and put into different groups who were doing different things. A group of twenty people were staying at all twenty stations and there were ten different stations. Another group of twenty children were staying with a group of children, who were rotating around all of the stations. A smaller group of five children were split up and became a group of four and one. The one (Alex rushby (he was chosen because he sprained his wrist)) was the photographer and the four stayed at the two drink stations. We did this twice and it took us up to lunch time and after that was year three and four races where only eight children

helped. Then it was our turn. When it was our turn we did a mixture of races like: Relay race, egg and spoon race and the long distance run (which is basically a lap around the field.) On our sports day we had year 5s and year 6s. Plus we did our races in bird house colors which were: Red, Yellow, Green and blue.

My races were: 70-meter flat, Long distance run and relay race. My team colour was Red and we came second out of four. My team score was 68 and the winning team was Green with 72 points and the team that came third was Yellow and the team that came fourth was blue. Also I won all of my races except the 70-meter flat because I came second but someone else in my team came first.
